Art Unit: 1756

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/263,083, filed on 3/8/99.

2. Claims 1 and 8-11 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the fluorine-containing epoxy resin compositions having in one molecule at least one perfluoroalkyl group of 6 to 12 carbon atoms and at least two alicyclic epoxy group and a cationic catalyst which are exemplified in the specification, does not reasonably provide enablement for other fluorine-containing epoxy resin compositions beside those disclosed in the specification. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. There are no general guidelines how to prepare the present fluorine-containing epoxy resin except those disclosed in the specification.

3. Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
